Turner

Cost Index

Turner's Building Cost Index: High Level of Construction Activity Continues to Stretch Skilled Labor Availability

Turner Building Cost Index—which measures costs in the non-residential building construction market in the United States—has increased to a value of 1230 (100 in base year 1967).

| Quarter | Index | % Change |
|------------------|-------|----------|
| 4thQuarter 2021 | 1230 | 1.91 |
| 3rd Quarter 2021 | 1207 | 1.68 |
| 2nd Quarter 2021 | 1187 | 1.28 |
| 1st Quarter 2021 | 1172 | 0.09 |

Turner has prepared the construction cost forecast for more than 80 years. Used widely by the construction industry and Federal and State governments, the building costs and price trends tracked by The Turner Building Cost Index may or may not reflect regional conditions in any given quarter. The Cost Index is determined by several factors considered on a nationwide basis, including labor rates and productivity, material prices and the competitive condition of the marketplace. This index does not necessarily conform to other published indices because others do not generally take all of these factors into account.

Based on the Cost Index and factor for Indiana construction, we estimate 7 - 9% per year construction cost increases over the next 12 months
