COUNTY ENGINEER

COUNTY HIGHWAY DIRECTOR

GENERAL CONDITIONS

No application will be accepted for consideration unless accompanied by the required fee and plans /drawings.

Permit expires 1 year from date of issuance. If work has not been started within this 1-year period, a new permit is required. This permit covers any lateral hook-ups and/or service connections made within thirty (30) days from the date of permit approval. After thirty (30) days' time, a new permit is required.

A copy of the permit application and all necessary plans are required to be on the construction site at all times.

No work shall begin before the Right-of-Way Permit has received approval from Montgomery County.

The applicant shall be responsible for the Two Hundred Fifty Dollar (\$250.00) per day fine that will be imposed if construction begins prior to Right-of-Way Permit approval.

The applicant acknowledges that approval of the Right-of-Way Permit will be subject to supplemental conditions. These conditions will be listed on an attachment to the approved permit and, among the supplemental conditions, will be the maintenance of construction for a period of at least two (2) years.

The County Surveyor's Office **must** be notified of this project to discuss the presence of legal drains. The Surveyors phone number is 765-366-2498.

One lane of traffic must remain open at all times unless prior permission to close road has been given by the Montgomery County Engineering Department.

Traffic, pedestrian, and worker safety shall be observed at all times. Montgomery County will not be liable for any accident that occurs due to the failure to follow safety regulations as established by O.S.H.A., the State of Indiana, the County, or any other agency that may have jurisdiction in the area.

A permit is required for any utility proposing to perform maintenance, whether overhead or underground, to an existing line.

Bored holes will generally be required for all installations of lines less than 10". An open cut may be considered for lines 10" or larger.

Any small service lines are required to be pushed under the pavement. No open cuts are allowed for these lines.

Any pre-existing structure within the right-of-way shall be restored to as good as or better than original condition and shall be done in a timely fashion.

Mailbox post(s) shall be restored to postal specifications.

All road cuts must be backfilled with #53 stone compacted in 8-inch lifts.

Prompt response to any needed maintenance for repair must be given. The County deems a prompt response as being the same day that the problem is reported if possible. If a prompt response is not given, future requests may require a bond, full time inspection, or denial of permit cutting.

SPECIFICATIONS
MONTGOMERY COUNTY RIGHT-OF-WAY PERMIT
APPLICATION
